

JUST LEAVE ME A MESSAGE

Problem 1

How do DI Ners communicate with each other? Creatively of course!! Your problem is to imagine ways to communicate that are NOT the usual ways of communicating. Your team will have two minutes to think about what message you need to communicate, and ways to do it. Brainstorm together as a team. You will have two minutes to present your solution. Communicate it in ANY way your team feels is most creative.

Scoring will be:

1-15 points for the creativity of the message

1-25 points for the creativity of the method of communication

1-25 points for the creativity of presentation of the communication

1-15 points for how well the team works together

Variation: Coaches: Add various materials...you know the stuff... duct tape, straws, and envelope, paper clips, buttons, a paper plate, etc. Look around at what you have on hand. Better yet, have the team create a list of materials. How can the team use these materials to communicate? Insist that they think past the ordinary! Crazier, the better! Remind them that if they can imagine it, they can make it happen.

Problem 2

What message would you leave? Your team must create three situations in which a message must be left for others to know what you intend to do. Team brainstorming your solution, create one situation that is sad, one situation that is humorous, and one situation that is exciting. You will have one minute to talk to each other, and write each situation that the team creates on one of the 3 x 5 cards.

Responding in order, the team members will say one of the chosen situations, and the message that they would leave. You will have two minutes for this part. If one member of your team is stuck, then the others must wait for that person to answer before the team can continue.
